## DETAILED ACTION

Receipt is acknowledged of the request for reconsideration filed 10/18/2007.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 27-32, 48-53 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-14 of copending Application No. 11/877595 (US'595). Although the conflicting claims are not identical, they are not patentably distinct from each other because US'595 claims a method of treatment comprising delivering a treatment agent and a barrier having a binding member in a time-varied manner, the binding member coupling with the tissue, and the barrier slowing transport of the treatment agent from the target tissue at a slower rate than if the barrier were not present, the barrier being biodegradable, and allows transport of the treatment agent towards the tissue. Those of ordinary skill would have expected similar therapeutic results from the use of the instantly claimed method given the claims of copending US'595 which use the same method of administering the same agents, carriers and binding agents. As such, the instant claims would have been obvious to one of ordinary skill at the time of invention given the claims of US'595.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

US Patent No. 6,458,387 (Scott et al) is cited as a patent of interest.

Barring the discovery of new art, the instant claims are free from prior art other than that cited in the obviousness-type double patenting rejection.
